

When life was ruthless

...Eyes were dreamless

...Hopes were shattered

Life was a total misery for a thirteen-year-old Nouman Banaras from Golra who lost his parents and now was facing the brutalities of life with his three siblings and an old disabled grandfather.

He was scattered by the sudden deaths of his parents and due to vulnerability he left his studies. He started helping his family with his brother when he came across Muslim Aid Rainbow Family a child development programme. He was picked up for sponsorship programme and again he got an admission in Al-Mehar Model School. That time he was very disturbed and strewn and could not focus on his studies. But due to comprehensive child development plan-specially designed for vulnerable kids- he is confident enough to face the challenges like debates and sports.

His principal expressed that Nouman was a very reserved and pessimistic in the start but now he is looking very dynamic and energetic, his life has totally transformed and now he is one of the distinguished student of his class.

The principle admired his struggle for life and encouraged the efforts to improve the livings of the deprived and destitute.

His best friend Anis-ur-Rehman is very happy to find an honest and caring friend who is also helpful in studies.

Miss Easha, his Chemistry teacher found Nouman a disciplined, intelligent and a regular student. His favorite subject is Psychics because he wants to become a scientist and he also plays cricket in his spare time.

Nouman expressed his inner feelings and excitement by drawing a beautiful scene of mountains and the rising sun, he also drew a house and trees, and explained that mountains are beautiful, trees give us oxygen, sun provides us light and I want to be a part of that beautiful life.
